

Rosa setigera

Prairie Rose

Another rose native to Michigan, found in woods and thickets. Its deep to pale pink flowers are a bright spot in the garden. Leaves turn shades of yellow, then orange, red and finally purple in the fall. The pale red or orange hips add color and interest to the late fall and winter garden.

Suggested Companions: bur oak (*Quercus macrocarpa*), eastern redcedar (*Juniperus virginiana*), fragrant sumac (*Rhus aromatica*)

Plant Type: Shrub

Size: 6-12' H
12-20' W

Water Tolerant: No

Habitat:

Open field/ Prairie
Woodland Margin

Soil: Average Garden Soil
Sandy/ Gravelly

Exposure: sun

Flower Color:
Pink

Plant in:

Groundcover: No

Bloom Time:
July

Other Attributes:

Fragrant
Wildlife attracting
Winter interest
Bird attracting
Butterfly attracting
Fall color
Deer resistant
